

Gantt Project

quick introduction

Gantt Chart View

Gantt chart shows a timeline, task bars and dependencies between the tasks.

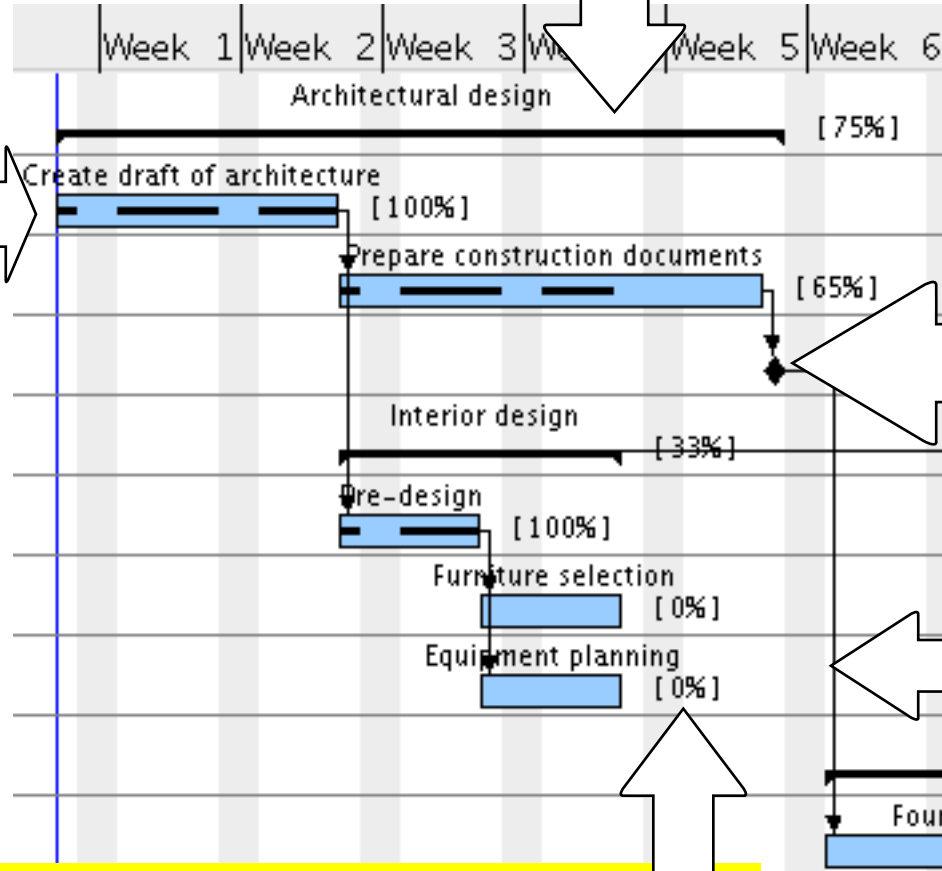

Vertical red line indicates the current time, vertical blue lines designate project start and end dates.

Task table shows all your tasks. It is a tree-like structure, with supertasks and nested tasks.

Tasks on the chart

Supertasks. Use a small button bar above the task table or *(Shift+)Tab* keys to indent tasks.

Regular tasks. You can create them using toolbar, main menu, context menu or keyboard shortcuts *Ctrl+T* or *Insert*.

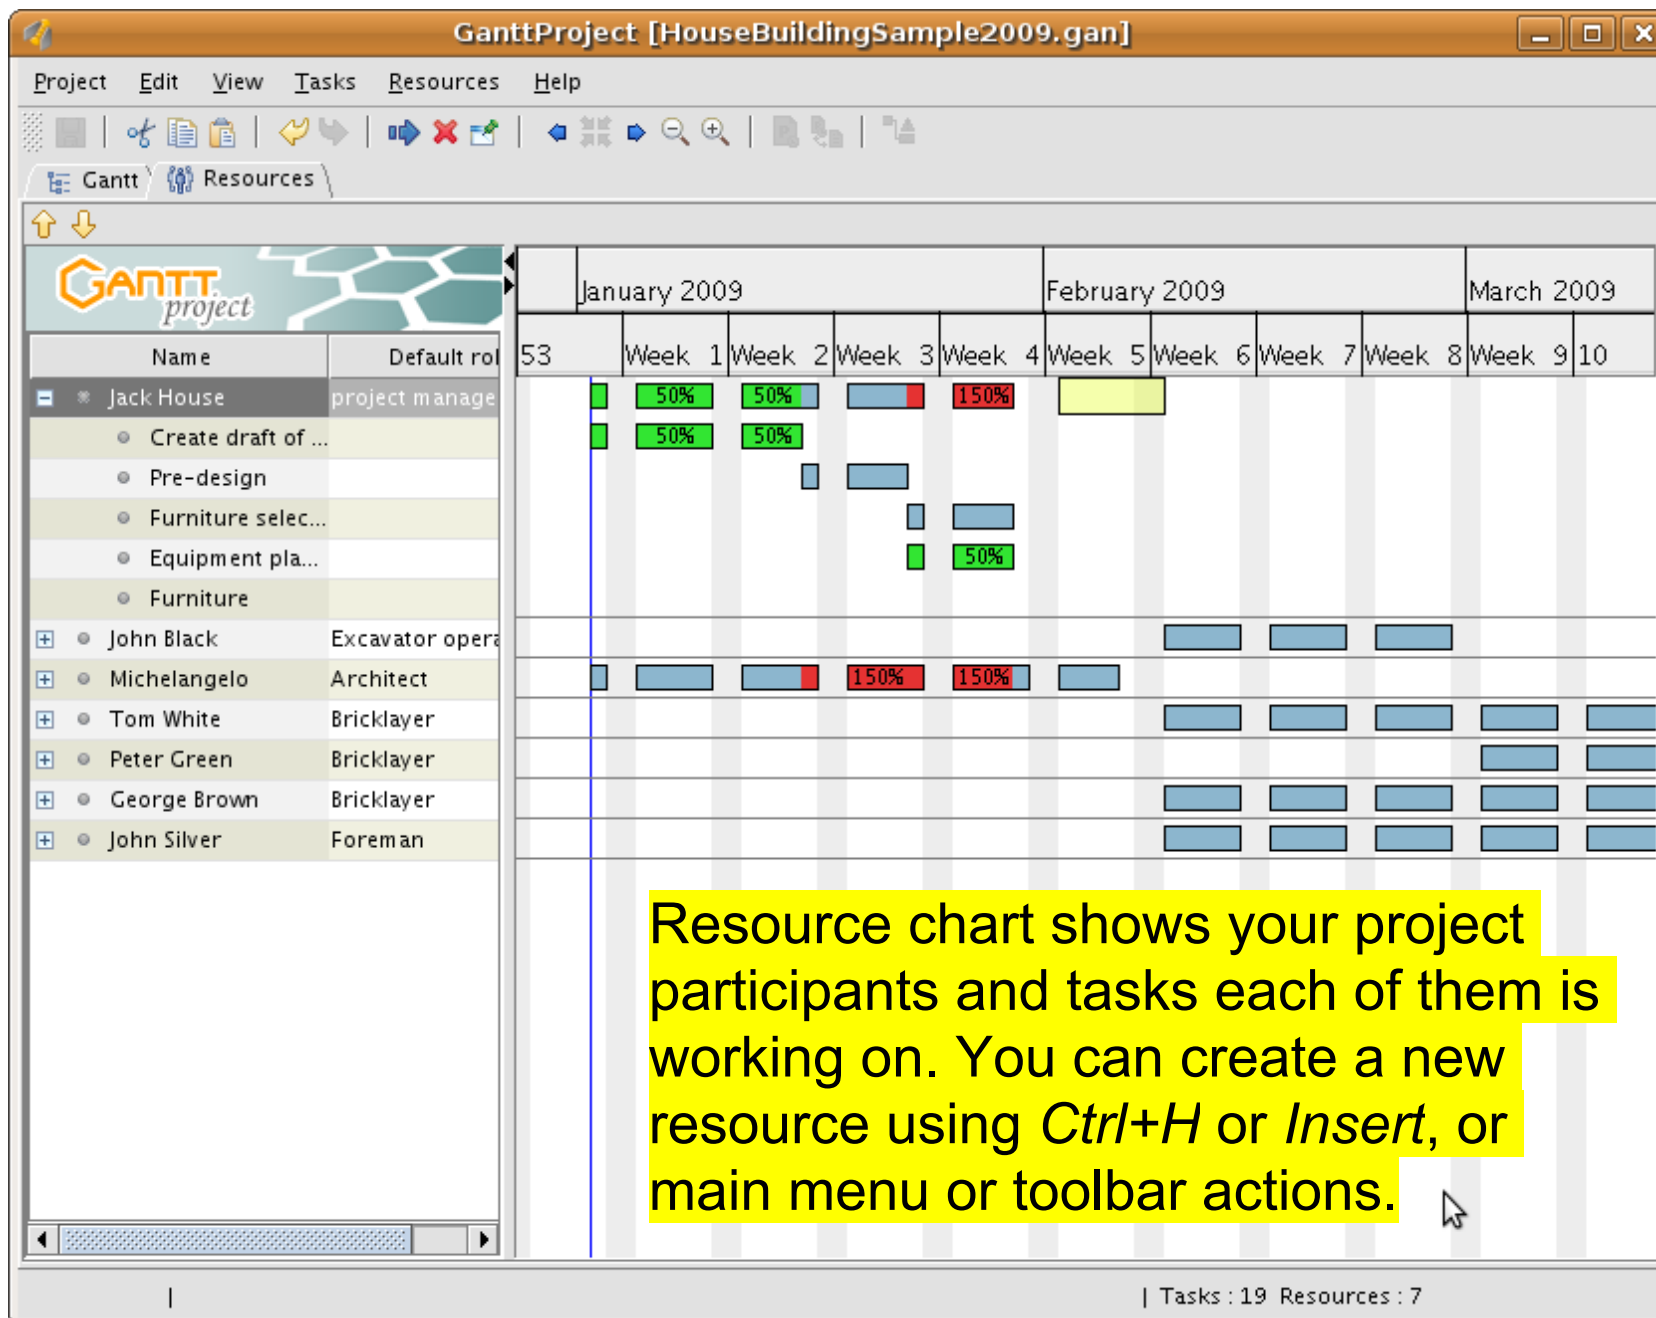

Milestones. You can mark a task as a milestone in the *Task Properties* dialog.

Dependencies. You can create them in the *Task Properties* dialog or just dragging a line from a predecessor to a successor task. The dialog lets you choose dependency types and lags.

Task properties. You can edit them in the *Task Properties* dialog or in the task table. In the chart options you can define what to show on the chart.

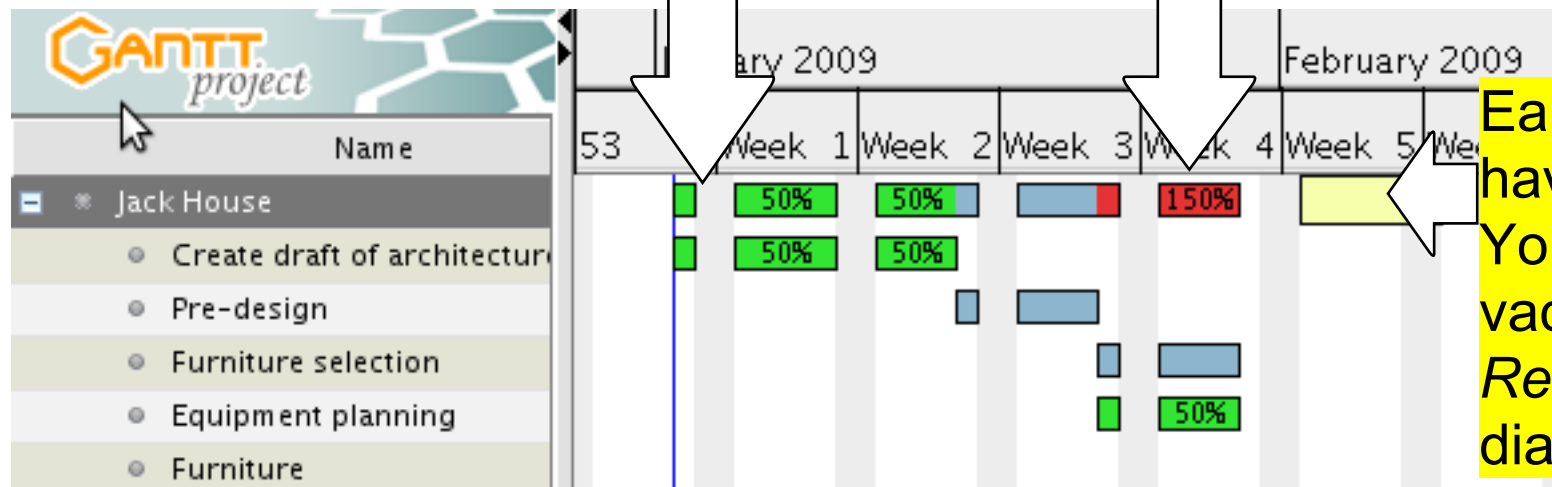

Resource Chart View

Resource Chart Details

Jack House is not very busy in the first two weeks.

But he eventually becomes overloaded, working 100% on Furniture selection and 50% on Equipment planning. Busy time.

Early February he is having a week off. You can configure vacation time in *Resource Properties* dialog.
